The history of this prestigious brand began in the hills above Lake Geneva.

In 1949, Maurice Chaponnier, a chemist, herbalist, and researcher, studied the benefits of oligotherapy. During his research, he discovered the incredible power of trace elements on the body, and more specifically on the skin.

A pioneer in his field, he then had the idea of introducing them into cosmetic skincare products and founded Laboratoires HORMETA.

Exceptional anti-aging skincare products inspired by the prestige of rare and precious ingredients sourced from Swiss nature.
